

Caden Burnett

Austin, TX | 512-969-8030 | cadenburt7@gmail.com | cadenburnett.com

EDUCATION

Texas A&M University

Bachelor of Science in Industrial and Systems Engineering

Minor in Computer Science and Engineering Project Management

College Station, Texas

Dec 2026

GPA : 3.425

Relevant Coursework: Quality Engineering, Modern Manufacturing Methods for Engineering Design, Engineering Economy, Optimization Modeling, Stochastic Modeling, System Simulation, Production Systems Engineering, Uncertainty Modeling, Human Factors Engineering

PROFESSIONAL EXPERIENCE

Tesla

Production Planning Engineering Fall Co-op

Austin, Texas

August 2026-December 2026

The BHW Group

Data and Operations Analyst Internship

Austin, Texas

May 2025-August 2025

- Developed an automated Excel VBA system to track and audit employee leave balances across 15 years of data, improving accuracy of workforce planning and reducing manual review time
- Identified misclassified leave categories through SQL analysis, improving accuracy of workforce availability forecasting and reducing scheduling risk
- Met with potential new clients to understand business needs and present company capabilities

Data and Operations Analyst Internship

May 2024-August 2024

- Created Named Entity Recognition (NER), Clustering, and Merge/Purge scripts to clean vendor and customer datasets using Scikit, Pandas, Python, and SQL
- Analyzed discrepancies between Excel financial datasets using Anomaly Detection, Python, and Postgres

PROJECTS

Texas A&M University

Manufacturing Process & Quality Analysis Project

College Station, Texas

December 2025

- Used Minitab and Excel to analyze 20 days of real-world production data from a manufacturing process and conducted a benchmark and capability analysis
- Determined the process was stable with 54.9% of nonconformities stemming from three out of sixty-nine defects
- Recommendations resulted in statistically significant increase in conforming units produced daily

Facility Simulation Project

March 2026

- Developed Simio model of packing and distribution facility system to analyze throughput, WIP, cycle time, and resource utilization under variability
- Identified bottlenecks via scenario analysis of arrivals, processing, and routing for improvements

SKILLS, ACTIVITIES & INTERESTS

Technical Skills: Lean, Six Sigma, Data analysis (SQL, VBA, Python, Minitab), Engineering project cost analysis, Production planning, Inventory control, Simulation, CNC Machining, SolidWorks

Activities and Interests: Kappa Sigma, Intramural Soccer, Institute of Industrial and Systems Engineers, Grace Bible Church, Weightlifting, Film
